A B S T R A C T

Cost management budget applications are needed by the Company in the business process. The design of the budget system to be built aims to create a budget that will be used for a certain period and without any changes in the current period so that the system can produce an accurate report and improve the effectiveness and efficiency in determining the funds required division. Data collection method used is by doing observation, interview and literature study. The design result of this writing is a budget management system in the form of web cost so that the control in the financing required by each division and can avoid the occurrence of excess or lack of budget. Based on the results of the design and implementation of the budget draft can solve the problem in the process of financing at PT Primer Eka Property.

INTRODUCTION

Among the various aspects of the company, the cost budget is the most important thing to maintain the stability between income and expenses incurred to meet operational and promotional needs.

The first problem that often arises is the absence of planning on the budget cost so that the expense of greater than the revenue received (Over Budget). The second problem is the absence of good budget planning can also lead to lack of funds provided by the company so that the budget (budget) that has been made not in accordance with the paid so that the budget (budget) becomes irrelevant Running scope: each division enters data using excel, the standard cost budget format used in 1 year running, then uploads the excel file, and is validated by each manager.

With the objective: to produce reports that the company needs as an evaluation material and

direct control costs with the budget to remain stable. Where the benefits: simplify the recapitulation process of all divisions and generate relevant budget costs, minimize errors and simplify the calculation of budget costs.

I. METHODS

Framework of thought can be seen in figure 1

Table 1. SWOT Analysis

STRENGTH	WEAKNESS
1. Can make a budget quickly.	1. Some parts are done manually so that the possibility of error is quite large.
2. The face-to-face budgeting of each division with the financial division can clarify the purpose and cost to be used.	2. The occurrence of excess costs because the budget is not controlled.

3. Can change and manage Real Time figures.	3. Planning costs that have not been too prepared.
OPPORTUNITY	THREAT
1. With budget making directly there is no doubt from each division as it will be clearer with the meeting of each division with the financial division.	1. The need for sudden funds that make the financial difficulties in finding sources of funds.
2. More structured budget to be prepared.	2. Payment that should be paid is postponed due to sudden funding needs.
	3. Can affect company cashflow.

Identify needs

Requirement: Automated budgeting app

Problem: Often over budget

Proposed: Can upload excel and compile budget report
